About This Game

Featuring 17 levels where you should grab and help the animals make their way to the feeder.
Levels are designed to increase with difficulty.

Animals are animated in a childish way: they "stride" and track the movement of the mouse with their eyes.
Level 18 is a bonus where you ought to avoid windblown leaves and collect the apples, with Ladybird.

There is a wide range of animals you can choose from:
Elephant, Rhino, Hippo, Bear, Cow, Horse, Deer, Lion, Tiger, Pig, Panda, Sheep, Monkey, Dog, Cat, Rabbit and Fox.
The big elephant has to complete only a turn till the crate, while the fox must walk alot.

Suitable for small children who are not yet confident using the mouse.
If the task appears to be too hard there is the option to rescale the animal.
(as an alternative to reducing difficulty it would be advisable to purchase a mouse specifically for children)

WARNING! This game is impossible to play. Take a good look at the Replay Level screen. That is pretty much all you will see.

The idea is to get your animal through the maze without touching the walls. This I found impossible even on the first level. Also I posted on the Discussions board for the games - with no response from the devs. Apparently the game has been released and abandoned.
