. . pictures, a large number of which are of famous models and therefore are less popular with the general public. I'm interested in this book because it seems to exist in the place of the old in-camera photograph, which became so popular in the mid to late 20th Century. This is supposed to be a book filled with photographs, but . . . a lot of the text is stories and personal reflections by the author. I feel I'm stepping in to the middle of his own life, and I want to know what I'm doing. I've never read anything by or about Richardson, so I have no knowledge of the context of the material, but I wonder if he's someone who is particularly difficult to discuss. I'm interested in your opinions of Richardson as a person and as a photographer. What makes him a compelling artist? And what makes him so difficult to discuss? A: That's because he's a multifaceted man. He had a stellar modeling career as well as his own successful career as a photographer, even producing advertising campaigns. He also had a sideline as a fetishist, which may have been an accidental discovery of his, as he tried to recreate certain moments in fashion magazines. The internet has a lot of information, including a video of a confrontation between Richardson and a young child, who tries to convince the man to call 911 on himself. In the end, Richardson gets arrested and charges are filed against him. Most of his published work in print is from the early 90's, but the internet has a lot of stuff from the late 80's and early 90's, that is, from before the lawsuit. Anyway, you shouldn't be afraid of him, he's not a violent or scary person. If anything, I think you'll find a lot of insight into his inner psyche in his stories. Good luck!
